

EAACI Clinical Fellowship Report

DR Lucia Diaferio

Project title: Skin tests are important in children with β -lactam hypersensitivity, but may be reduced in number.

Duration: 3 months: June 2017 to August 2017

**Host Institution: Departement de Pneumologie et Addictologie.
Hopital Arnaud de Villeneuve CHRU de Montpellier. 34295
Montpellier (France).**

Supervisor: Prof. Pascal Demoly

I would like to thank EAACI for giving me the opportunity to have this experience in Montpellier in such a great allergy team. I started my fellowship in June 2017 in the Departement de Pneumologie et Addictologie, Hopital Arnaud de Villeneuve CHRU de Montpellier. The team was nice and welcoming, I had a nice time there working, learning, and sharing. I had access to clinics, challenges and research for my project, and was allowed to sit in clinics and to stay with every member of the team. I spent my time in the unit: attending to clinics, challenges, sharing experiences and improving my skills in allergy participating in courses and conferences, improving my scientific knowledge. I saw food, drugs, venom and immunotherapy challenges. The unit was well organized and I saw the management of patients, protocols and treatment in case of reaction. During my time in the unit, I had the chance to work and focus on my project. I would like to thank all the members of the team of the department for welcoming me and sharing all their knowledge. Finally, I would like to express all my gratitude to EAACI again for their education program and the promotion of knowledge.

Merci EAACI !!!

Lucia Diaferio
