

Report
EAACI Fellowship program

Project: Cutaneous Allergy

Supervisor: dr Clive Grattan

Fellowship winner: dr Marija S. Stankovic

I had a great pleasure to be a part of EAACI Fellowship program, and affiliated to Department of Cutaneous Allergy, St John's Institute of Dermatology, Guy's and St Thomas' Hospitals in London from 15.04.2019. till 15.07.2019.

During fellowship, I was included in various activities at Department.

We have worked on interesting project about urine N-methyl-histamine determination in patient with diagnosed or suspected Mast cell activation syndrome. Moreover, I had an honour to attend specialized weekly clinics in Urticaria, Mastocytosis, General Dermatology and Allergy, under supervision of my mentor, but also under supervision of other specialist in the Trust, especially dr Chris Rutkowski. I was one of the speakers at St John's Dermatological Society meeting with theme "Primum non nocere - hyperhidrosis". In addition, I had opportunity to attend Royal Society of Medicine meeting, Guy's and St Thomas' Trust Chronic Urticaria and Angioedema Meeting, and Ground rounds in Guy's hospital. During fellowship, I have contributed to creation/revision of Patient satisfaction survey, and drugs information sheets in Urticaria clinic. We are looking forward to work together on one monography.

This fellowship gave me an opportunity to learn a lot, to become familiar with health and research system in UK, and to make wonderful collaborations. Therefore, I would strongly recommend EAACI fellowship program to future participants.

At last but not least, I would like to express my sincere gratitude to EAACI, dr Clive Grattan, dr Chris Rutkowski, and to all the members of St John's Institute of Dermatology, from whom I gained new knowledge and who made this collaboration fruitful.

Sincerely,

Dr Marija S. Stankovic
