

27 – 29 March 2025
Bilbao, Spain

Exhibition Floor plan *information subject to change

The EAACI-ESCD Skin Allergy Meeting is the leading European meeting devoted to skin allergy. The eighth edition of this biannual event will be held digitally, taking place on 27-29 March 2025 and constituting a unique opportunity for clinicians and researchers to access the latest developments on cutaneous allergy and related disorders. EAACI will organise SAM Digital 2025 in collaboration with the European Society for Contact Dermatitis (ESCD), an organisation committed to promoting research, awareness and knowledge on contact dermatitis and other environmental and occupational skin diseases. Both organisations will contribute to making this an exceptional experience for attendees, who will benefit from a highly interactive and content-rich focused meeting.

EAACI SAM 2023 – EAACI Sections

* Sample size – 356

EAACI SAM 2023 – Scientific Focus

- Sample size – 356
- Delegates were able to choose multiple focus areas

Scientific Focus	Percentage
Mechanisms	92%
Management	65%
Epidemiology	53%
Clinical	45%
Diagnosis	45%
Allergen Diagnosis	39%
Atopic dermatitis	38%
Urticaria	34%
Molecular allergology	32%
Contact allergic dermatitis	30%
Laboratory tests	28%
Vaccines	28%
Anaphylaxis in Food Allergy	27%
Biomarkers	26%
Anaphylaxis in Drug Allergy	26%
Hereditary angioedema	26%
Clinical aspects	23%
Anaphylaxis in Insect Venom Allergy	22%
Gastrointestinal immunology and allergy	19%
Pediatric Allergy	18%
Immunopathology	17%
Inflammations	17%
Allergy prevention and risk factors	16%

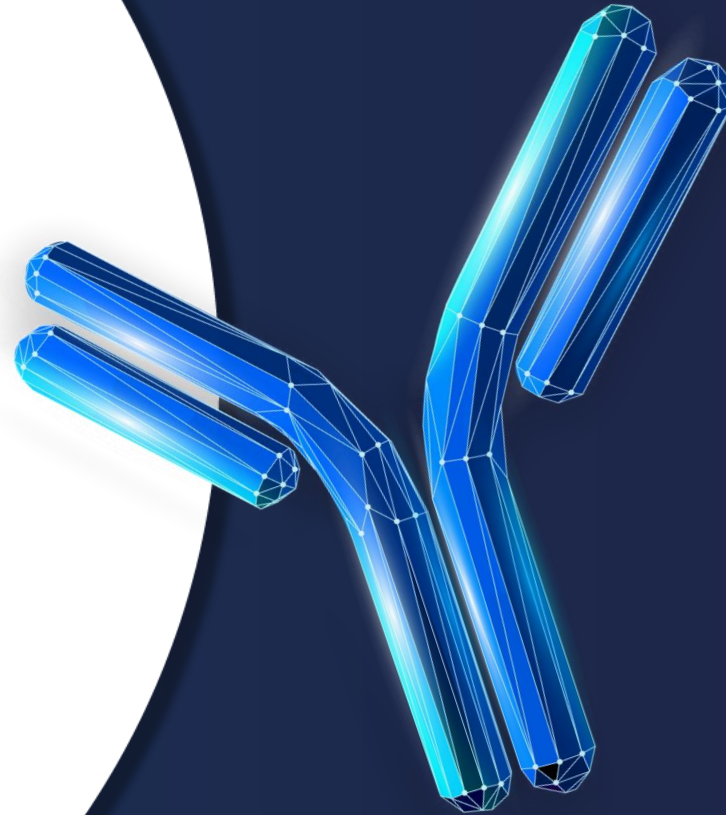

EAACI SAM 2023 – Scientific Focus (continued)

- Sample size – 356
- Delegates were able to choose multiple focus areas

Scientific Focus	Percentage
Rhinitis	15%
Biologicals	15%
Genetics	15%
Pediatric Food Allergy	14%
Clinical Immunology	14%
Pediatric Asthma and Rhinitis	14%
Animal studies	13%
Mastocytosis & Mast cells	13%
Pediatric cutaneous and drug allergy	13%
Rhinosinusitis and nasal polyps	12%
Allergy immune responses	12%
Conjunctivitis	12%
Eosinophilic Esophagitis	11%
Pediatric Epidemiology	10%
Autoimmunity	9.68%
Immunodeficiencies	10%
Airborne Allergens	10%
Allergen characterisation	9%
Air Pollution	9%
Insect Venom	9%
