

PAAM Hybrid 2023

Porto, Portugal
2-4 November

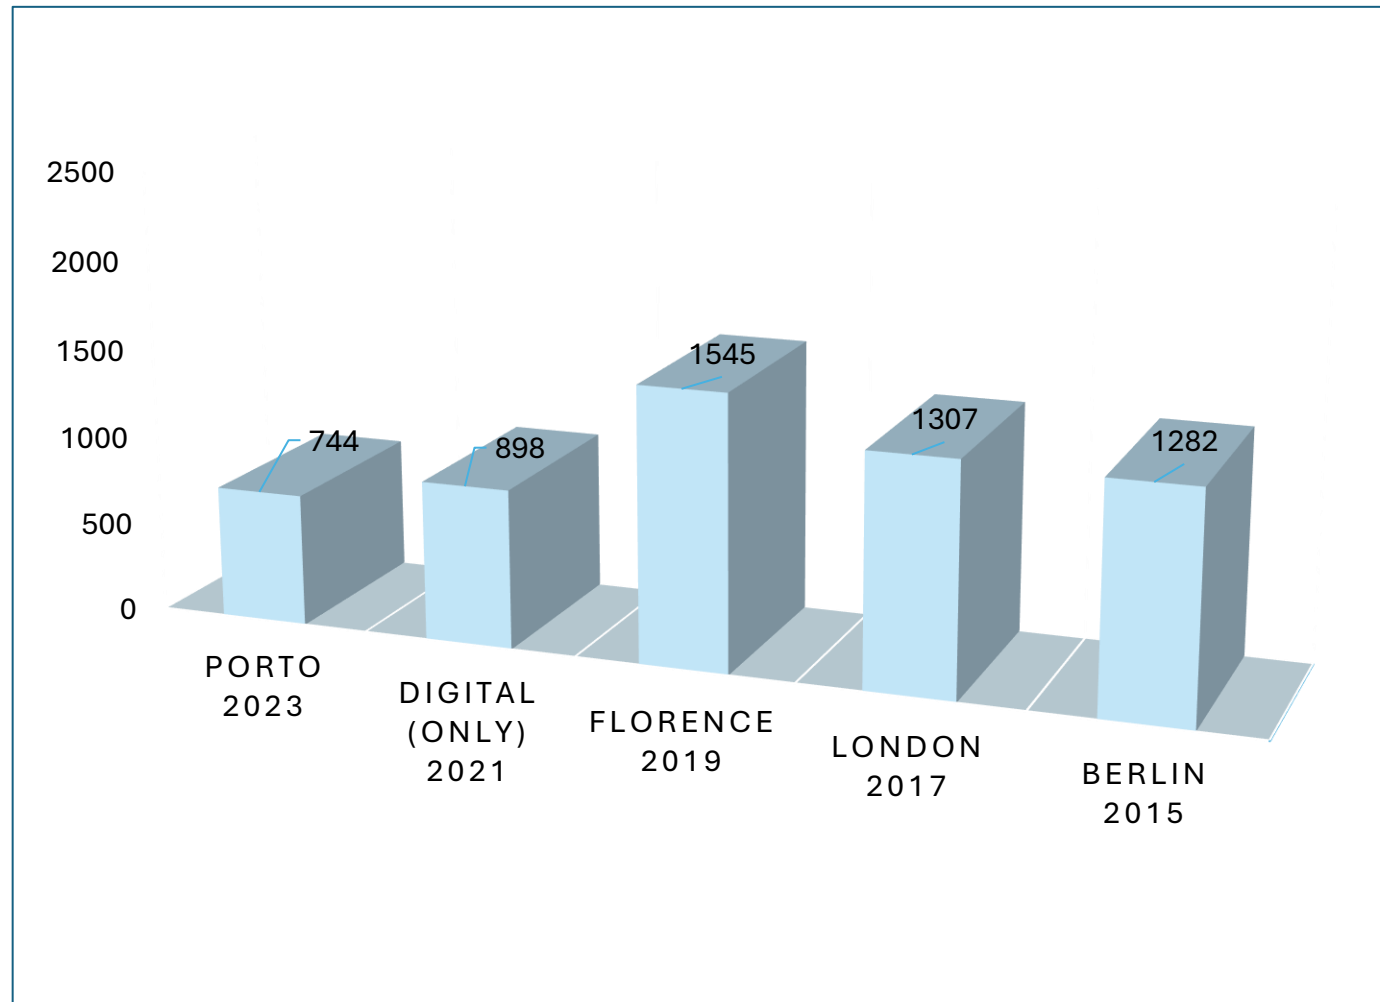

Pediatric Allergy and Asthma Meeting

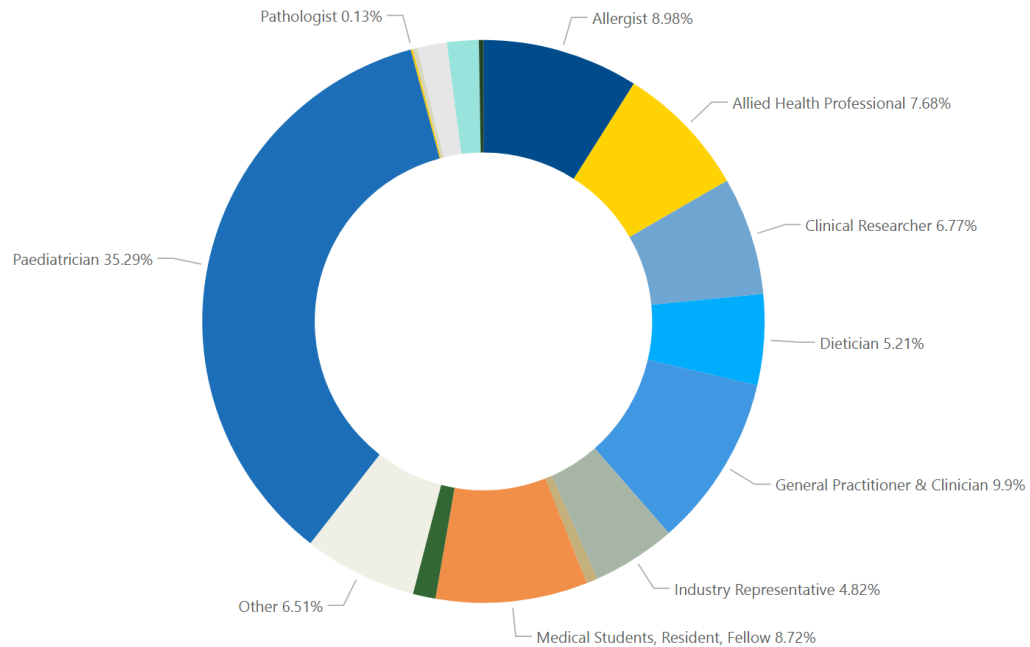

PAAM 2023 was attended by internationally renowned experts who are committed to sharing new research and findings, and coming up with solutions to the most pressing challenges in the pediatric field. The burden of allergic diseases and asthma in children has been significantly increasing during the last years, among other reasons due to differences in lifestyles, age of food introduction and industrialization. Allergy is a multi-system disorder, and children often have several co-existing diseases, i.e. allergic rhinitis, asthma, eczema and food allergy.

PAAM continues to provide the best platform for ensuring that research and science allows experts worldwide to gain and share knowledge on the most current developments.
