

## Checklist of the Documents Requested for the Application

### EAACI Certified Clinical Centres on Immunotherapy

This document is prepared for you to check your evidence

*While preparing your application, **please first read the standards for EAACI Certified Clinical/Research centres on Immunotherapy** and check whether your centre **fulfils all the basic (essential) standards**.*

If you fulfil the **basic criteria**, we kindly ask you to **prepare a report on how you provide the basic standards and support by evidence** related to these **basic standards** in digital format.

Once you prepare your report, digital evidence and fill the application form, then you can submit your application online.

#### **Please note that:**

1. The evidence indicated **in the evidence box** for each **basic standards** should be in digital format (jpeg images or electronic documents such as word files or pdf) and should be **numbered based on section** (i.e.: section 1.1 strategic plan)
2. All digital documents can be presented in one pdf document if relevant explanation and numbering are used
3. The centres can upload additional evidence to support their eligibility and competency.
4. The centres are not asked for the existence of evidence related to “Area for improvement” part but, if the centre already has evidence for that standard, they can attach this to the document
5. The digital evidence can be in native language

EAACI is aware of the diversity in regulations across countries, which may lead to a limitation for covering some of the basic standards. So, if any of the standards are not covered due to local regulations or data protection policy, please first contact the Quality Committee to evaluate the eligibility of your application.

*Please do not hesitate to contact with us for any questions.*
