#EAACICongress2026

Abstract Prize Winners

Flash talk sessions (FT)
&
Pitch session (PiS)

Presenter	Session Name	Session Reference	Abstract Title	Abstract Id
Jensen Signe Kjeldgaard	Infections	FT01	Neonatal airway hyperreactivity and obstruction associates with lung function deficits in adulthood independent of early-life respiratory infections	001459
Atasever Merve Dilsad	Delayed hypersensitivity and desensitization	FT02	Can Repeated Enzyme Desensitizations Lead To The Development Of Transient Tolerance?	000632
Zhao Bingjie	Epithelial dysfunction from airway to gut	FT03	Maltol and ethyl maltol induce barrier dysfunction and cellular stress in nasal organoids	001560
Matzner Laura	Food allergy - From predictors to treatment	FT04	Cord blood DNA methylation pattern predicts childhood food allergy	000610
Burgess Matthew	Translational research in asthma: from biomarkers to genetics	FT05	Allergic airway inflammation alters myeloid and fibroblast sub-populations within the murine lung	000303
Perlato Margherita	Skin tests and molecular sensitization profile value applied in Allergy diagnosis	FT06	Early skin testing as a reliable tool for the management of immediate hypersensitivity reactions to chemotherapy (pleasing both the allergologist and oncologist)	001693
Cihanbeylerden Melek	Broaden the view in treating the united airways	FT07	Effects of Breathing Exercises in Patients with Severe Asthma Receiving Biologic Therapy: A Prospective Non-Randomized Controlled Clinical Study	001062
Silva Diana	Clinical and translational ENT allergy	FT08	Real-world knowledge, confidence and practice patterns in ocular allergy: results of an EAACI Task Force global survey	001556
Gonzalez-Garcia Daniel	Omics studies in allergic diseases, potential application in biological tratments	FT10	Early epigenetic changes associated with mepolizumab treatment in severe asthma	001676
Trujillo Wurttele Juan Enrique	From pregnancy to pandemic: early predictions of allergy disease	FT11	Management of IgE-Mediated Egg Allergy in Ireland and Spain: A 10-Year Multicentre Review	000871

Presenter	Session Name	Session Reference	Abstract Title	Abstract Id
Senter Riccardo	Hereditary angioedema 1	FT12	Treatment choices and effectiveness among HAE type 1 and 2 patients: data from the Italian Reference Centers Network for Angioedema (ITACA) Registry	000958
Goksel Ozlem	Where allergy meets cancer	FT13	Rapid desensitization following carboplatin hypersensitivity in recurrent ovarian cancer improves survival and delays platinum resistance	000845
Baş İlke	Challenge of anaphylaxis phenotyping and adrenaline use	FT14	ORAL IMMUNOTHERAPY SUCCESS: AGE, SPECIFIC IgE, OR BOTH?	000976
Prieto-Moreno Pfeifer Ana	Immediate type hypersensitivity	FT15	Natural Evolution Of Hypersensitivity To NSAIDs In Children	001699
Vural Yeşim	Work and air pollution: out of the frying pan and into the fire	FT16	Effect of PM2.5 Obtained from 2023 Turkey Earthquakes on Ferroptosis Signalling in Primary Human Bronchial Epithelial Cells and 3D Organoids with/without COPD	001703
Asero Riccardo	Educational tools to improve management and quality of life in allergic disease	FT17	Implementation of a urticaria care package in the general practitioner setting increased quality of chronic spontaneous urticaria management	000625
Kopiec Tomasz	Tailoring allergy treatment: SLIT, Steroids, and targeted therapies in children	FT18	Too Much of a Good Thing? Lessons from Excessive Inhaled Corticosteroids, Persistent Cough, and Growth Suppression	001930
Piano Eleonora	Precision medicine in Allergy: targeted biologic therapies	FT19	Evaluation of remission in a cohort of Italian patients with severe asthma and CRSwNP who experienced switching of biologics	001985
Yanikoglu Rabia Sare	Emerging concepts in basic immunology	FT20	Isoquercetin Mimics Pioglitazone in Suppressing LPS-Induced Airway Inflammation Through Ferroptosis-Associated Mechanisms	001779
Kratzer Bernhard	Mechanistic insight in AIT	FT21	Allergen-laden VNP decorated with IL-12 show enhanced Th1 priming activity and reduce Th2 immune responses in a preclinical humanized mouse model of mugwort allergy	000717

Presenter	Session Name	Session Reference	Abstract Title	Abstract Id
Zhang Hangtian	Nasal polyps and beyond	FT22	Investigation of Single-Cell Transcriptional Heterogeneity in the Olfactory Mucosa of Patients with Chronic Rhinosinusitis and Olfactory Dysfunction	000934
Kruger Emma	Urticaria contact dermatitis	FT23	Regional differences in chronic inducible urticaria	001454
Kahveci Ecem	Systems immunology across the spectrum: from inborn errors to therapy in pediatrics	FT24	Hematopoietic Stem Cell Transplantation for EBV-Associated Disease in Children with Inborn Errors of Immunity: A Case Series	000664
Fukuda Risa	Mastocytosis	FT25	Urinary Lipid Metabolite Profiling in Pediatric Cutaneous Mastocytosis by Lipidomics	000358
Akarsu Muhittin	Too little, too much: primary immunodeficiency and autoimmunity	FT26	Screening for Primary Immunodeficiency in Adults Attending Pulmonary and Allergy Clinics: A JMF-10-Based Study	001300
Morillas-Armenta Jaime	Biomarkers in food allergy and skin allergy	FT27	Systemic metabolic biomarkers identifying clinical tolerance in lipid transfer protein (LTP) allergy after pectin intervention	000745
Layhadi Janice A	New clinical and immunologic insights in AIT for Food and Respiratory Allergy	FT28	A Hypoallergenic Ara h 2-VLP Peanut Vaccine: Tolerogenic Immune Features in Healthy Volunteers	001709
Michel Moise	Molecular Allergology	L-FT01	Analytical concordance of Euroline® and ImmunoCAP® for peanut component-specific IgE	100482
O'Neill Alice	Allergen immunotherapy	L-FT02	Home up-dosing Oral Immunotherapy for Treenuts, Other allergens and Peanuts In Children - HOT TOPIC Study	100433
Schoos Ann-Marie	Skin Allergy	L-FT03	Longitudinal blood proteomics in childhood atopic dermatitis	100273

Presenter	Session Name	Session Reference	Abstract Title	Abstract Id
Cohn Danny M.	Immune deficiencies and autoimmunity	L-FT04	HAELO, a Phase 3, Global, Randomised, Double-Blind, Placebo-Controlled Study of Lonvoguran Ziclumeran, a CRISPR-Based Gene Editing Therapy, in Patients with Hereditary Angioedema	100217
Weiss-Tessbach Matthias	Anaphylaxis	L-FT05	Intramuscular epinephrine/adrenaline fails to reverse histamine-induced hypotension in a randomized, placebo-controlled human model of anaphylaxis	100026
Vera-Berrios Rosialzira Natasha	Food allergy	L-FT06	Component-resolved diagnosis in nut and peanut allergy across Spain in patients from the BIOGRAL study	100394
Stoll Peter	Allergy diagnosis	L-FT07	Transport of allergenic tropomyosins through the intestinal epithelium	100721
Yılmaz Ergün Ummüğülsüm	Dermatology	L-FT08	Baseline Immune Profile and Response-Based Stratification in Chronic Spontaneous Urticaria: Implications for Therapeutic Transition	100644
Raskopf Esther	Immune modulatory therapies for allergic diseases	L- FT09	Treatment with mannan-conjugated birch pollen allergoids is safe and well tolerated in adult and adolescent birch pollen allergic patients – results from a Phase III DBPC trial	100182
Pedretti Sarah	Drug allergy	L- FT10	Differential vascular inflammatory programs linked to kallikrein dynamics in African ACE inhibitor-associated angioedema	100369
Akenroye Ayobami	Asthma	L-FT11	Chronobiologic Variation in Th1, Th2, and Th17 Cytokines in Severe Asthma	100722
Seys Sven	AI in diagnosing and treatment of asthma	PI501	Real-world evaluation of an Artificial Intelligence (AI)-assisted skin prick test readout method in children	100495
